

Functional Specification Triggerhub

Description:

Our app makes automation easy and effortless. In just a few clicks, connect your APIs and build smart workflows that run on their own. No more repetitive tasks—save time, stay focused on what matters, and let our platform do the work for you. The perfect tool for busy people who want to achieve more with less effort.

Pages available:

Homepage:

Experience a smarter way to work. Our platform makes automation easy and effortless—connect your APIs, build intelligent workflows, and let them run on their own. No more repetitive tasks, just more time to focus on what really matters. The perfect solution for busy people who want to achieve more with less effort.

Dashboard:

Manage and monitor all your workflows from one place. The dashboard gives you a clear overview of your active automations, their statuses, recent activity, and performance. Easily edit, pause, or trigger workflows in just a few clicks—all from a single, intuitive interface.

Services:

Browse our library of available services and integrations. Whether you're connecting popular APIs or niche business tools, our platform lets you link them effortlessly. Combine multiple services into powerful workflows—no coding required.

About:

Our mission is simple: to make automation accessible to everyone. Behind this platform is a team passionate about productivity, efficiency, and smart technology. Learn more about our story, our values, and why we're building the tools that help people work smarter every day.

User Story:

1st Step – Home Page

Users arrive on the home page of the site, where they can view a brief description of the platform and freely explore its contents.

2nd Step – Login/Sign Up

Users navigate to the Login/Sign Up page. Here, they can either:

- Create a new account using their email and password, or
- Log in to an existing account using their credentials or a third-party service (e.g., Google login).

3rd Step – Services Page

After logging in, users access the **Services** page. This section displays all available services and their respective offers, allowing users to explore what's available.

4th Step – Workflow Page

Users can visit the **Workflow** page to view and manage the services they have already subscribed to.
